

AS BUILT Documentation K 70101 Tank Farm Košice

Chapter 3.10.2 Piping Documentation Tank Farm Area File 2

- Piping Material Specifications (piping Classes, Air Liquid Standards)
 - Pipe class Specification PN63, Pipe class AA63C1, Standard 50020
 - Pipe class Specification PN25, Pipe class ZB25C1, Standard 50026
 - Pipe class Specification PN10, Pipe class ZB10C1, Standard 50030
 - Pipe class Specification PN10, Pipe class AA10C2, Standard 50035
 - Design safety recommendation
Gaseous oxygen piping protective Barriers
 - Design safety recommendation
Design Requirements for gaseous oxygen piping
 - Safety spacing requirements around oxygen station
 - Safety distances around liquid oxygen storages tanks
(in the absence of a protection wall)
 - Protective walls for oxygen piping
 - Oxygen station
Design rules
 - Pipelines and accessories for oxygen in production plants
 - Insulation joint on gaseous oxygen piping, general specification
 - Insulating joint on gaseous oxygen piping particular specification
 - Isolating joint on gaseous oxygen ducts
 - Piping list
 - Complete valve list
 - List of control valves
 - Safety valve list
-
